

Employee Educational Opportunities & Night School News
Class Schedule for April 1, 2024 through June 5, 2024

Spring 2024

"Take that step to change
your life. Your future self
IS WAITING."

Roger Lee
Application Deadline: March 1, 2024

Spring Term 2024

Night School

Application Deadline: March 1, 2024

Classes Begin: April 1, 2024

Classes End: June 5, 2024

Class Locations: B23, B1728, B1919, B79, B903, and NetCenter: Suite 130 (NPD Training) and Suite 195 (Technical Learning Ctr.)

Minimum Required Enrollment: 10 students are **REQUIRED** to schedule a course

Classes Meet: Monday & Wednesday, Tuesday & Thursday, one night per week, or Saturdays

Class Hours: Math daytime classes are 12:00-2:30pm. Night Math Classes are 4:15-6:45pm. Trades and computer classes are 4:30-7:00pm one night per week. Mechanical Drawing and Pipe Welding will be 8:00am-1:00pm Saturday mornings.

Course Length: Courses are 9 weeks, Shipyard Operations is 10 weeks long.

Cost: No tuition fee for Night School classes. **Books are the only cost to employees.** A certificate is awarded upon successful completion of a course. **VPCC** classes require a tuition fee unless otherwise specified.

Application: Available on the [Night School page](#) of the www.as.edu website

Return completed application by email to Katelynn.Cherry@hii-nns.com

Course Announcements: Class confirmation will be sent via **email** approximately 2 weeks before class begins.

For Further Information: Visit the [Night School Website](#) or contact Katelynn Cherry at 757-688-8608.

COURSE OFFERINGS SHIPYARD NIGHT SCHOOL

APPRENTICE APPLICATION CREDIT COURSES: These courses are designed to help fulfill application requirements for consideration for entry into The Apprentice School. We must have enough students to hold the class (10).

Pre-Algebra (45 Hours)

T TH 4:15- 6:45 PM TBD A-SCH, BLDG. 1919

Algebra I, Part A (45 hours)

M W 12:00—2:30 PM TBD A-SCH, BLDG 1919

Algebra I, Part A (45 Hours)

T TH 4:15 - 6:45 PM S. Risinger A-SCH, BLDG. 1919

Algebra I, Part B (45 hours)

Prerequisite: Algebra I, Part A

M W 4:15 - 6:45 PM E. Oliver A-SCH, BLDG. 1919

Algebra II, Part A (45 hours)

Prerequisite: Algebra I, Part A & B

T TH 12:00—2:30 PM S. Krist A-SCH, BLDG. 1919

Algebra II, Part A (45 hours)

Prerequisite: Algebra I, Part A & B

M W 4:15- 6:45 PM C. Rossi A-SCH, BLDG 1919

Algebra II, Part B (45 hours)

Prerequisite: Algebra 2, Part A

M W 4:15 - 6:45 PM E. Dickens A-SCH, BLDG. 1919

Geometry (45 hours)

T TH 4:15 - 6:45 PM S. Martin A-SCH, BLDG. 1919

Mechanical Drawing I - II (45 hours)

Prerequisite: Be able to use a 12-inch ruler graduated in 1/16 inch increments; knowledge of basic geometry

T TH 4:15 - 6:45 PM C. Blake A-SCH, BLDG. 1919

SAT 8:00 AM- 1:00 PM C. Blake A-SCH, BLDG. 1919

COMPUTER RELATED COURSES

Access– Introduction (22.5 hours)

<i>T</i>	<i>4:30 - 7:00 PM</i>	<i>D. Belew</i>	<i>NetCenter: TECHNICAL LEARNING CTR</i>

“A dream doesn’t become reality through magic: it takes sweat, determination and hard work.. “

Colin Powell

SHIPBUILDING RELATED COURSES

Basic Ships Theory, Design and Systems (45 hours)

M W 4:30-7:00 PM

D. Holton

NetCenter: TECHNICAL LEARNING CTR

This completely revised the 2012 course covers nuclear and non-nuclear surface ships and submarines with many hands on learning applications used to reinforce the concepts in the training. A reality is that many people in shipbuilding seldom or never get to see the larger picture of what goes into ships and ship design beyond their trade or daily area of responsibility. The Basic Ships Theory, Design and Systems Course was developed as a way to provide **NNS Apprentices, Designers, Trainees, Engineering Staff, Co-op's and New Hires** with a basic working knowledge of the locations and purpose for naval and non-naval ships fundamental structural components and operating systems. Upon completion of this course, students will be able to recognize and describe the basic concepts and function of the following subject matter as they apply to surface ships and submarines: history of boats, ships and shipbuilding, shipboard terminology, lines and shapes, basic structural components of commercial and naval vessels, basic components and operations of a shipboard piping system, basic types of shipboard propulsion systems, nuclear fission, a basic nuclear propulsion system, radiation and shielding, energy production sources and shipboard use of energy, the primary shipboard auxiliary systems, deck gear and machinery, basic shipboard refrigeration, air conditioning and ventilation systems, fire science and firefighting systems, basic electricity, power generation and distribution, shipboard electrical and lighting systems, fundamental electronic sensors and surface weapons systems, introduction to submarine control systems, life support systems, high pressure air systems, flood control systems, communication and navigation systems, weapons, rescue systems, future ships technology, and beyond. Depending on availability, this course may contain one shop tour and or one ship tour. Tours require standard safety equipment and company badge for participation.

***Shipyard Operations (25 hours)**

T 4:30 - 7:00 PM

M. Burkett

BLDG. 903/5, CONF RM 514 A&B

W 4:30 - 7:00 PM

L. Showalter

BLDG. 903/5, CONF RM 514 A&B

This course is designed for employees who are interested in learning about Newport News history, organizational structure, shop manufacturing, and ship construction processes. The course examines modern shipbuilding by combining lectures with walking tours of the manufacturing shops and ship. ***During these shop, submarine, and carrier tours there will be extensive walking as well as climbing and descending multiple levels of stairs.** This is an excellent course for employees who have not had the opportunity to explore the shipyard or for new employees who are interested in learning overall shipbuilding processes. Earbuds are required for this class they need a 3.5 mm plug. This course runs for 10 weeks.

Naval Nuclear Propulsion Plant Fundamentals (22.5 hrs.)

W 4:30 – 7:00 PM

R. Young

Net Center: (NPD Training) Suite 130

This course introduces the naval nuclear propulsion plant to students with limited or no background in the subject. Class discussions include various components used throughout a nuclear propulsion plant: pumps, valves, heat exchangers, etc.; some of the many systems found within a nuclear propulsion plant, and how these systems work together to support operation of the ship. Students will become familiar with the fission process and how the energy of fission is used to power a naval nuclear ship.

The course also covers the basics of how a naval nuclear propulsion plant is operated. An overview is provided on how the shipyard works with nuclear ships to build and refuel them. So bring your questions and get an understanding of how your role here at the shipyard contributes to ultimately making our ships operate efficiently and safely. This course should not be taken by E80 division personnel who are required to take a similar course, known as 4K1, as part of their normal divisional training.

The Company reserves the right to change or discontinue these programs without prior notice.

TRADE RELATED COURSES

Air Conditioning & Refrigeration (45 hours)

T TH 4:30-7:00 PM

J. Lavallis

A-SCH, BLDG 1919

Teaches basic knowledge of how both shipboard and home air-conditioning and refrigeration systems work. The course covers the fundamentals of the four basic components of every air-conditioning system, accessories, pressure and temperature relationships, EPA regulations for refrigerants, introduction to passing the "EPA certification exam", 1990 Clean Air Act (Recovery, Recycle, Reclaim), troubleshooting, servicing, maintenance, and load calculations. EPA Certification exam to be performed on last night of Class. There is a charge for the EXAM only.

Electrical Theory (45 hours)

T TH 4:30-7:00 PM

G. Allshouse

A-SCH, BLDG 1919

This course combines the concepts of Direct Current (DC) and Alternating Current (AC) theories formerly taught in the Electricity I and II classes. It focuses on several key concepts from the original classes such as electrical safety, atomic theory, types of electrical circuits, Ohm's law, and DC versus AC. New integrated concepts include motors, electro-mechanical controls, and shipboard electrical distribution.

Fundamentals of Corrosion Control Through Coatings (45 hours)

T TH 4:30-7:00 PM

M. McCluer

A-SCH, BLDG 1919

Designed for the experienced and inexperienced tradesmen and engineers who desire to increase their level of knowledge in the blast and coating trade. Course provides theoretical and practical information on the use of coatings to control corrosion and the economic benefits derived from proper selection and application. Topics include: basic principles of corrosion, coating types and characteristics, proper selection of coatings, surface preparation, equipment, techniques, media and standards, environmental issues and concerns, inspection procedures and protocols and other coating processes, i.e., metal finishing process, metalizing, electrostatic deposition and powder-coating.

*****Pipe Welding Program (50-200 hours)**

Sat 8:00 AM - 1:00 PM

D. Kaminski

WELDING SCH, B1728

The Pipe Welding Program is an intensive 200-hour curriculum designed to give graduates of the Advanced SMAW program or qualified welders the opportunity to gain experience in selected areas of pipe welding using the SMAW and GTAW welding processes. Although planned as a 200-hour program consisting of four courses, individuals may progress to their own pace. Disclaimer- Passing this class does not qualify to weld in the Yard. However, a minimum of 50 hours of training and a demonstrated competency in all four courses are required to complete the program and receive a certificate. **Required for the class: Half shield and Tunstall holder.**

Fundamentals of Pipefitting (45 hours)

M W 4:30-7:00 PM

S. Pearson

B610 Cr. 201

Focuses on how to read and interpret blueprints and the use of basic tools used for pipefitting. The course introduces orthographic projection, piping symbols, reading a scale, and blueprint information blocks. Additional topics include shipbuilding terminology, "X" and "Y" dimensions, arrangement drawings, make up of flanged pipe joints, small tubing and pedestal benders, determining size of bending head radius, micrometers and dial gages, and bend rolling offset

*****Classes are full; still accepting applications!**

The Company reserves the right to change or discontinue these programs without prior notice.

VIRGINIA PENINSULA COMMUNITY COLLEGE (VPCC) CERTIFICATE PROGRAMS

VPCC tuition and fees are applied to all VPCC Certificate Program Courses. Student is responsible for submitting grades and book receipts. ***DEADLINE for enrollment and release forms will be May 3, 2024 by 4:00pm.***

FUNDAMENTALS OF ORGANIZATIONAL LEADERSHIP CAREER STUDIES CERTIFICATE PROGRAM (3 Credits Each)

Did you know.....?

You **MUST** apply for graduation after completing course requirements to receive your VPCC Certificates. However, there is **NO OBLIGATION** for you to participate in the formal Graduation Ceremony held annually in May.

Graduation application deadlines are as follows:

Summer 2023 Deadline-June 1

Fall 2023 Deadline-October 1

Spring 2023 Deadline-March 1

Upon approval for graduation, VPCC will notify you via your VPCC e-mail address. If you have any questions please contact Graduation Specialist Carmen Charland at 757-825-2846 or CharlandC@vpcc.edu.

VIRGINIA PENINSULA COMMUNITY COLLEGE

VIRGINIA PENINSULA COMMUNITY COLLEGE (VPCC) CERTIFICATE PROGRAMS REGISTRATION, COURSE ENROLLMENT, & EDASSIST PROCESS:

*A Night School application should be submitted to request a seat in your desired class.
After your request has been processed, you will receive an email notification to confirm the class.*

*The email notification is **not** an enrollment notice.*

*All applicants (new or continuing students) must register as an official student at VPCC (can be done at www.vpcc.edu/apply). After registering with VPCC, notify the Night School Administrator, Devonne Whitley at Devonne.LWhitley@hii-nns.com . She will then email the enrollment form and release form with a return deadline of **May 3, 2024**. The enrollment form and release form must contain your VPCC student ID number and physical signature.*

(If you have previously been a VPCC student but have not attended for two terms, you must re-register.)

Begin your EdAssist (Bright Horizons) process to pay for your VPCC class(es). This process requires submission of:

- *Education Assistance Goal, Application (must be completed & submitted in EdAssist)*
- *Request disbursement for class(es) applied for.*

The Night School Administrator will send out a notification when it's time to process, after classes have been verified. (Making it with the minimum 10 students required).

Graduation and document requests must be submitted within 60 days of course completion. This can be done on the VPCC website.

Didn't Finish High School?

FREE TO ALL NNS EMPLOYEES

General Educational Development Certificate (GED)

The GED Test is a four subject online test.

Graduates are awarded a CERTIFICATE of high school equivalency

National External Diploma Program (NEDP)

The NEDP is a self-paced, web-based program.

The program offers flexibility to earn your high school diploma even if you are employed full time.

Adult Education Classes:

Math Assistance

Adult Basic Education

GED Exam Prep

English as a Second Language (ESL)

A caring teacher is ready to help you!

Just one call can get you on road to a better future!

Whether you are 18 or 55, **you can** get a high school diploma (GED). Our trained staff provides individualized tutoring in the areas of reading, writing and math. For more information, or to schedule an appointment, please contact: **Peninsula Regional education Program website at—<http://www.peninsulaed.com>** To schedule an evaluation and start this next chapter of your life.

Imagine the pride and self-confidence you'll feel when you reach your goal!

Do it for your FAMILY...

Do it for YOURSELF!
